IP68 Rating

UV-Absorbing Glasses

MINI UV LED Leak Detection Flashlight

The LeakTracker™ MINI is an advanced tool that illuminates all UV dyes, even within the dirtiest diesel engine oil.

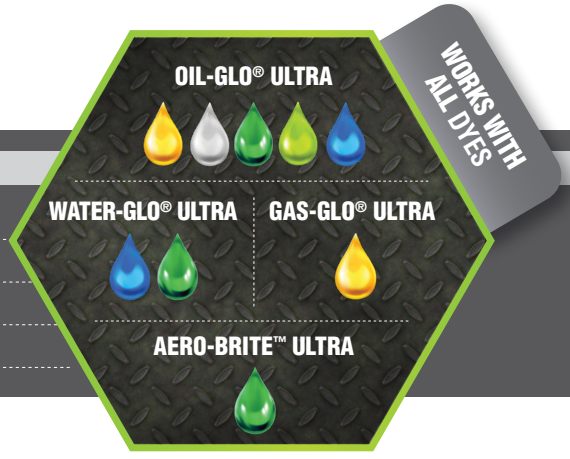
SPI-LTM

FEATURES:

- Rugged IP68 rating ensures superior water and dust resistance
- Expanded detection range of up to 25 feet (8 m) brings previously hard-to-reach leaks into focus
- Efficient design extends runtime for uninterrupted work periods
- At its core, powerful LED technology emits a concentrated UV beam, enabling effortless leak detection.

Equip yourself with the LeakTracker™

A combination of accuracy, durability, and advanced technology designed to revolutionize your leak detection experience.



SPECIFICATIONS

Light Source:	UV LED (365 nm)	**Weight:**	0.24 lbs (0.11 kg)
Lamp Style:	Cordless Flashlight	**Power Source:**	(3) AAA Batteries
Lamp Head Diameter:	1.3 in (3.3 cm)	**Run Time:**	6 hours (continuous)
Length:	5.2 in (13.2 cm)	**Leak Detection Range:**	Up to 25 ft (8 m)

FIND LEAKS FAST IN FLUID SYSTEMS LIKE HYDRAULIC, WATER/GLYCOL, AVIATION & MORE

NEW PART #

LeakTracker™ MINI cordless, UV LED lamp, with three AAA batteries, UV-absorbing glasses and small green carrying case

What Is Fluorescent Leak Detection?

Fluorescent leak detection uses fluorescent dye to brightly show all leaks in closed-loop circulating, fluid-based industrial systems.

Find leaks quickly and pair this lamp with our OEM grade UV fluorescent dye.

Step 1

ADD DYE

Add a small amount of dye to the system & let it circulate

Step 2

SCAN SYSTEM

Scan system with a Spectroline leak detection lamp and see any leaks **glow brightly**

24/7

CONTINUOUSLY CIRCULATING

Working for you around the clock, **24/7** to quickly identify any future leaks
