### SAFETY DATA SHEET

### Castrol Transmax Limited Slip LL 75W-140

### Section 1. Identification

Product name Castrol Transmax Limited Slip LL 75W-140

Product code 469687-DE01
SDS no. 469687
Use of the substance/mixture Gear lubricant

For specific application advice see appropriate Technical Data Sheet or consult our

company representative.

Product type Liquid.

Supplier Castrol New Zealand Limited

73 Remuera Road Newmarket

Auckland, New Zealand

www.castrol.com/nz

Technical Helpline 0800 10 40 60

Emergency telephone number 0800 243643 (0800 CHEMHELP) (NZ use only)

**New Zealand National Poisons** 

Centre

0800 764 766 National Poison Centre

### Section 2. Hazards identification

HSNO Classification ONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3

This material is classified as hazardous according to criteria in the Hazardous Substances (Hazard Classification) Notice 2020.

This material is not classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

Routes of entry Dermal contact. Eye contact. Inhalation.

**GHS label elements** 

Signal word No signal word.

**Hazard statements** Harmful to aquatic life with long lasting effects.

**Precautionary statements** 

**Prevention** Avoid release to the environment.

Response Mot applicable.

Storage Not applicable.

Disposal Dispose of contents and container in accordance with all local, regional, national

and international regulations.

Other hazards which do not

result in classification

None known.

## Section 3. Composition/information on ingredients

Substance/mixture Mixture

Synthetic base stock. Proprietary performance additives.

Product nameCastrol Transmax Limited Slip LL 75W-140 Product code 469687-DE01 Page: 1/8

Version 3 Date of issue 23 February 2022 Format New Zealand Language ENGLISH

## Section 3. Composition/information on ingredients

Ingredient name	%	CAS number
Polysulfides, di-tert-Bu	1 - 5	68937-96-2
Distillates (petroleum), solvent-dewaxed light paraffinic	1 - 5	64742-56-9
Distillates (petroleum), solvent-dewaxed heavy paraffinic	1 - 5	64742-65-0
Amines, C12-14-alkyl, reaction products with hexanol, phosphorus oxide	1 - 5	91745-46-9
(P2O5), phosphorus sulphide (P2S5) and propylene oxide		
Amines, N-tallow alkyltrimethylenedi-	0.1 - 1	61791-55-7
Amines, N-tallow alkyltrimethylenedi-, oleates	0.1 - 1	61791-53-5
Amines, N-tallow alkyltrimethylenedi-, C4-18-alkyl phosphates	0.1 - 1	68603-74-7

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

### **Description of necessary first aid measures**

Inhalation If inhaled, remove to fresh air. Get medical attention if symptoms occur.

Do not induce vomiting unless directed to do so by medical personnel. Never give Ingestion

> anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Get medical attention if adverse

health effects persist or are severe.

Skin contact Wash skin thoroughly with soap and water or use recognised skin cleanser.

Remove contaminated clothing and shoes. Wash clothing before reuse. Clean

shoes thoroughly before reuse. Get medical attention if symptoms occur.

**Eye contact** r case of contact, immediately flush eyes with plenty of water for at least 15

minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing.

Check for and remove any contact lenses. Get medical attention.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician Treatment should in general be symptomatic and directed to relieving any effects.

**Protection of first-aiders** No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

## Section 5. Firefighting measures

**Extinguishing media** 

**Suitable** Use foam or all-purpose dry chemical to extinguish.

Not suitable Do not use water jet.

Specific hazards arising Fire water contaminated with this material must be contained and prevented from from the chemical

being discharged to any waterway, sewer or drain. In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic

life with long lasting effects.

**Hazardous combustion** Combustion products may include the following:

carbon oxides (CO, CO<sub>2</sub>) (carbon monoxide, carbon dioxide) products

Hazchem code Not available.

No action shall be taken involving any personal risk or without suitable training. Special precautions for firefighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if

**Special protective** Fire-fighters should wear positive pressure self-contained breathing apparatus

equipment for fire-fighters (SCBA) and full turnout gear.

Product nameCastrol Transmax Limited Slip LL 75W-140 Product code 469687-DE01 Page: 2/8

Format New Zealand Version 3 Date of issue 23 February 2022 Language ENGLISH

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".

For emergency responders

Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".

**Environmental precautions** 

Kvoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

#### Methods and material for containment and cleaning up

**Small spill** 

Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Contaminated absorbent material may pose the same hazard as the spilt product. Dispose of via a licensed waste disposal contractor.

### Section 7. Handling and storage

Precautions for safe handling

Fut on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Avoid contact of spilt material and runoff with soil and surface waterways.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Store and use only in equipment/containers designed for use with this product. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

**Not suitable** Prolonged exposure to elevated temperature.

## Section 8. Exposure controls/personal protection

### Control parameters

Version 3

#### Occupational exposure limits

Ingredient name	Exposure limits
vistillates (petroleum), solvent-dewaxed light paraffinic	NZ HSWA 2015 (New Zealand).  WES-TWA: 5 mg/m³ 8 hours. Issued/ Revised: 6/2016 Form: Mist  WES-STEL: 10 mg/m³ 15 minutes. Issued/ Revised: 9/2010 Form: Mist
Distillates (petroleum), solvent-dewaxed heavy paraffinic	NZ HSWA 2015 (New Zealand).  WES-TWA: 5 mg/m³ 8 hours. Issued/ Revised: 6/2016 Form: Mist  WES-STEL: 10 mg/m³ 15 minutes. Issued/ Revised: 9/2010 Form: Mist

Product name Castrol Transmax Limited Slip LL 75W-140

Product code 469687-DE01 Page: 3/8

Date of issue 23 February 2022

Format New Zealand Language ENGLISH

## Section 8. Exposure controls/personal protection

Recommended monitoring procedures

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Appropriate engineering controls

All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained.

Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards.

Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.

**Environmental exposure** controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

**Hygiene measures** 

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye protection Hand protection Safety glasses with side shields.

Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Nitrile gloves. The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

**Skin protection** 

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** 

In case of insufficient ventilation, wear suitable respiratory equipment. The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### **Appearance**

Physical stateLiquid.ColourAmber.OdourOily.

pH Not applicable.Melting point/freezing point Not available.

Kinematic: 24 to 25 mm<sup>2</sup>/s (24 to 25 cSt) at 100°C

**Particle characteristics** 

Median particle size Not applicable.

## Section 10. Stability and reactivity

Chemical stability The product is stable.

Possibility of hazardous U

reactions

Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not

occur.

**Conditions to avoid** Avoid all possible sources of ignition (spark or flame).

**Incompatible materials** Reactive or incompatible with the following materials: oxidising materials.

Hazardous decomposition
Under normal conditions of storage and use, hazardous decomposition products

**products** should not be produced.

## **Section 11. Toxicological information**

### Information on likely routes of exposure

**Inhalation** Vapour inhalation under ambient conditions is not normally a problem due to low

vapour pressure.

**Ingestion** No known significant effects or critical hazards.

**Skin contact** Defatting to the skin. May cause skin dryness and irritation.

**Eye contact** No known significant effects or critical hazards.

Product nameCastrol Transmax Limited Slip LL 75W-140 Product code 469687-DE01 Page: 5/8

Version 3 Date of issue 23 February 2022 Format New Zealand Language ENGLISH

## **Section 11. Toxicological information**

### Symptoms related to the physical, chemical and toxicological characteristics

**Inhalation** May be harmful by inhalation if exposure to vapour, mists or fumes resulting from

thermal decomposition products occurs.

**Ingestion** No specific data.

**Skin contact** Adverse symptoms may include the following:

irritation dryness cracking

Eye contact No specific data.

### Potential chronic health effects

**General** No known significant effects or critical hazards.

**Inhalation** Overexposure to the inhalation of airborne droplets or aerosols may cause irritation

of the respiratory tract.

**Ingestion** Ingestion of large quantities may cause nausea and diarrhoea.

Skin contact Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/

or dermatitis.

Eye contact

Carcinogenicity

No known significant effects or critical hazards.

Mutagenicity

No known significant effects or critical hazards.

#### **Aspiration hazard**

#### Name

Distillates (petroleum), solvent-dewaxed light paraffinic Distillates (petroleum), solvent-dewaxed heavy paraffinic

#### **Numerical measures of toxicity**

### **Acute toxicity estimates**

Route	ATE value
<b>⊘</b> ral	44610.89 mg/kg

# Section 12. Ecological information

### Ecotoxicity

This material is harmful to aquatic life with long lasting effects.

### Persistence and degradability

Not expected to be rapidly degradable.

### **Bioaccumulative potential**

This product is not expected to bioaccumulate through food chains in the environment.

Product/ingredient name	LogPow	BCF	Potential
Polysulfides, di-tert-Bu	5.6	-	high

#### **Mobility in soil**

**Mobility** Spillages may penetrate the soil causing ground water contamination.

Soil/water partition coefficient (Koc)

Not available.

### Other ecological information

Spills may form a film on water surfaces causing physical damage to organisms.

Oxygen transfer could also be impaired.

Product name Castrol Transmax Limited Slip LL 75W-140 Product code 469687-DE01 Page: 6/8

Version 3 Date of issue 23 February 2022 Format New Zealand Language ENGLISH

## Section 13. Disposal considerations

### **Disposal methods**

The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
