TYPICAL CHARACTERISTICS:

CLEAR BLUE COLOUR ACIDITY 0.015 mgKOH/g max AROMITICS 25% v/v max SULPHUR 0.03 % m/m (0.03 max) FLASH POINT 38 °C min 0.775-0.840 @ 15°C DENSITY -47°C max FREEZE POINT SMOKE POINT 21 mm DISTILLATION IBP 155°C **DISTILLATION FBP** 260°C

PRESENTATION:

KEROSENE is available in the following packages:

- 200Lt Drum
- 60 Lt Drum

HEALTH & SAFETY:

KEROSENE IS CLASSIFIED AS A HAZARDOUS SUBSTANCE 3.1C FLAMMABLE LIQUID For advice contact National Poisons Information Centre Phone 0800 764 766.

Avoid contact with eyes and skin and breathing vapours or mists.

EYE CONTACT

If this product comes in contact with the eyes: Immediately hold eyelids apart and flush the eye continuously with running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. Transport to hospital or doctor without delay. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

SKIN CONTACT

If skin or hair contact occurs: Quickly but gently, wipe material off skin with a dry, clean cloth. Immediately remove all contaminated clothing, including

footwear. Wash skin and hair with running water. Continue flushing with water until advised to stop by the Poisons Information Centre.

Transport to hospital, or doctor.

INHALATION

If fumes or combustion products are inhaled remove from contaminated area. Lay patient down. Keep warm and rested.

Lay patient down. Keep warm and rested. Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.

Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if pereserve

necessary. Transport to hospital, or doctor.

INGESTION

If swallowed do NOT induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice. Avoid giving milk or oils. Avoid giving alcohol.

If spontaneous vomiting appears imminent or occurs, hold patient's head down, lower than their hips to help avoid possible aspiration of vomitus.

A Safety Data Sheet is available for this product on request.
