

TRIM[®] OG205

High-performance Grinding and Honing Oil

TRIM OG205 is a very-high-specification grinding and honing oil formulated for carbide and HSS tool grinding operations. The product utilizes a very highly refined mineral oil with low aromatic content, which ensures very low levels of mist and high flash point. TRIM OG205 has been formulated to provide excellent wheel flushing properties together with good friction reduction and workpiece cooling.

Straight Oils

Straight to the point-of-cut:

TRIM[®] straight oils, used "straight up", without dilution of water, provide maximum lubricity. Typically used for operations such as Swiss-style screw machines, honing, grinding very difficult-to-machine materials, and gun drilling.

Depending on the specific product, some TRIM straight oils are a high-end blend of various base oils; while others contain extreme-pressure additives to control built-up edge and for added tool life.

Get straight to the cut with TRIM straight oils.

Choose OG205:

- No reaction with cobalt
- Very highly refined base oil ensures low mist and high flash point
- Can be used for light duty universal machining operations
- Good flushing properties keeps grinding wheels very clean
- Excellent friction reducing properties ensures long wheel life
- Excellent heat transferring properties
- Excellent oxidation stability
- Highly filterable in pre-coat filter systems
- Low foaming
- Kind to machine components and elastomers
- Light color and low odor for good operator acceptance

OG205 especially for:

Applications — carbide grinding, high-pressure, HSS grinding, machining, milling, reaming, tapping, and turning

Metals — aluminum, carbide, high-strength steels, stainless steels, steel alloys, and yellow metals

Industries — aerospace, automotive, general industry, and medical

OG205 is free of — chlorine and heavy metals

High-performance Grinding and Honing Oil

Application Guidelines

- TRIM OG205 is designed to be used neat.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/in/en-in/distributors/index.php>, your District Sales Manager, or call our Tech Line at +91-2135-675970.

Physical Properties Typical Data

Colour	Clear to pale yellow
Odour	Mild
Form	Liquid
Flash Point	> 150°C
Viscosity	5.50 mm ² /s @40°C

Ordering Information

20-litre pail
204-liter drum
1000-litre IBC
