High
Performance

WATER BASED – ALUMINIUM EXTRUSION

PRESENTATION

CONDALU 310 is an emulsion of release agents designed for aluminium extrusion.

USE

CONDALU 310 should be sprayed on the knife to cool them down and lubricate.

CONDALU 310 avoid soldering.

CONDALU 310 can be used RFU – Ready for Use

CONDALU 310 can be diluted by adding water.

Recommended dilution ratio: from 1:50 to 1:25

CHARACTERISTICS

	Units	CONDALU 310
Aspect	/	Liquid
Type	/	Milky
Colour	/	White
Specific gravity at 20°C	g/cm ³	≈ 0.981
Odour	/	Without
pH of concentrate	/	≈ 7
Viscosity AFNOR: Ford cup n°4	s	≈ 11
Carrier / diluents	/	Water
Temperature of storage	°C	From 5 to 40, keep off freezing
Shelf Life		1 year, under original packaging

Above details are issued from a production average; they are not specifications

PARTICULARITIES

- ❖ **CONDALU 310** is specifically designed to protect the knife.
- ❖ **CONDALU 310** is characterized by a good adhesion capacity on hot surfaces.
- ❖ **CONDALU 310** does not stain parts and does not produce smokes.
- ❖ Clean finish, bright finish aspect.
- ❖ **CONDALU 310** protects the press from corrosion.
- ❖ Very high resistance to micro-organisms.
- ❖ **CONDALU 310** does not build up knife, even at high concentration.
- ❖ Good thermal resistance at 450°C.

SECURITY
