DRUM ADAPTOR KIT

Drum Adapter Kits allow breathers to be installed on any storage tank or drum; there's never been a cleaner, more effective way to store, filter and pump lubricants from a drum. Unique design ensures all fluid handling is managed through one adapter. Anodized aluminum adapters have colorized quick connects for pumping oil in and out of drum. Single-port access to the oil reduces contamination as drum remains closed. Off-line filtration units easily connect to adapter without ever disrupting the performance of the breather.

Drum Adapter Kits are available in a dark gray color and configured with no Quick Connects, Iso-b Quick Connects or Colorized Quick Connects* available in 10 familiar OilSafe colors or silver.

*Colorized Quick Connects have been inspected to ensure anodized colors are within OilSafe color spectrum scope. Color and shade can vary on anodized components, this will not impact performance of product.

SPECIFICATIONS

- **Product** Drum Adaptor Kit
- **Height** 4.80"
- **Diameter** 2.5"
- **Mounting Connection** 2" MNPT
