Technical Data sheet

OILSAFE – Stretch Spout Hose Extension

The plug and strap ensures that the Stretch Spout Hose Extension is well protected from contaminants when not in use. This flexible Spout Hose attaches to the OilSafe Stretch Spout Lid, making awkward or hard-to-reach fill points easy and fast to access and service. The addition of the Stretch Hose Extension to the outlet spout of the Stretch Spout Lid also eliminates the need for funnels, which are notorious for attracting contaminants. The hose can be removed from the fittings and the length cut to suit the application.

- 12" in length
- Flexible design
- Ideal for awkward or hard-to-reach areas
- Easily attaches to the OilSafe Stretch Spout Lid
- Eliminates the need for funnels
- Hose length can be cut to suit application
